# What is ReadinessPoint?

ReadinessPoint™ is a simple yet powerful SharePoint application that helps senior managers assess whether their organization is ready to implement new ways-of-working. It has been developed by Bestoutcome in partnership with Complexus Pty.

Core features

- ReadinessPoint assesses 4 key areas of readiness to implement a change:
    - o **Organizational readiness**
    - o **Process readiness**
    - o **People readiness**
    - o **Technology readiness**

- It provides a detailed rating of how prepared the organization is for the new ways-of-working.

- A set of recommended **corrective actions** is also provided for every assessment. This ensures that any impact of the new ways-of-working on customers, staff, stakeholders, processes, technology and current levels of service can be minimized.

- Results can be exported, for communication with stakeholders.

- You can revise / edit your rating at any time during the project.

- Teams can collaborate and assess all major change initiatives in one place.

- The App can be used for any technology deployment or business change project.

How does it work?

- The software runs as an App in SharePoint.

- It runs in on-Prem SharePoint 2013 and O365 SP Online.

- You start the scoring process for your project by answering a set of simple questions with multiple-choice answers.

- Once the assessment is complete it is saved, dated & time stamped.

- Results and corrective actions can be e-mailed or printed.

Outputs & Reports

ReadinessPoint provides a dashboard summary for every change project:

- Drill down to see underlying problem areas and corrective actions.
- One-click report generation with PDF export allows all information to be shared.
- Build a picture of your progress towards improvement and successful outcomes.

Five reasons to use ReadinessPoint:

- ✓ Ease of deployment - installs as a SharePoint App for SP 2013 & O365 SP Online
- ✓ Can be used for any project in the Enterprise
- ✓ Simple and easy to use - assessments typically take 15 minutes to complete
- ✓ Easy to read dials and summary reports helps users to identify problems quickly
- ✓ Successful outcomes - helps ensure readiness for the new ways-of-working
