

What is RiskPoint?

RiskPoint™ is a simple yet powerful SharePoint application that helps senior managers assess the overall risk of a project, both at the start and at different stages throughout its life. It has been developed by Bestoutcome in partnership with Complexus Pty.

Core features

- RiskPoint assesses 4 key areas of risk on a project :
 - Right Project
 - Right Planning
 - Right Governance
 - Right Outcomes
 - It provides a detailed rating of how risky the project is, and allows you to instantly see problem areas.
 - RiskPoint™ uses simple read - amber - green dials to highlight top level scores
 - A set of recommended **mitigation actions** is also provided for every assessment. This ensures that you can effectively reduce the risk of the project failing to be delivered to budget, schedule, scope or quality targets and/or not full realizing the promised benefits.
 - Results can be exported, for communication with stakeholders.
 - You can revise / edit your rating at any time during the project.
 - Teams can collaborate and assess all major change initiatives in one place.
 - The App can be used for any technology deployment or business change project.
-

How does it work?

- The software runs as an App in SharePoint.
 - It runs in on-Prem SharePoint 2013 and O365 SP Online.
 - You start the scoring process for your project by answering a set of simple questions with multiple-choice answers.
 - Once the assessment is complete it is saved, dated & time stamped.
 - Results and corrective actions can be e-mailed or printed.
-

Programme Management Apps

Outputs & Reports

RiskPoint provides a dashboard summary for every project:

- Drill down to see underlying problem areas and corrective actions.
- One-click report generation with PDF export allows all information to be shared.
- Build a picture of your progress towards successful outcomes.

Five reasons to use RiskPoint:

- ✓ Ease of deployment - installs as a SharePoint App for SP 2013 & O365 SP Online
- ✓ Can be used for any project in the Enterprise
- ✓ Simple and easy to use - assessments typically take 15 minutes to complete
- ✓ Easy to read dials and summary reports helps users to identify problems quickly
- ✓ Successful outcomes - helps reduce the risk of the project failing to be delivered
